

Resolution Re: Forced exposure to toxic, unnatural EMFs, and excessive microwave radiation

2022 The US Health Freedom Congress
Hilton Airport Hotel, Bloomington, Minnesota
September 23rd and 24th 2022
Submitted by DAMS INC (Dental Amalgam Mercury Solutions)

A Resolution urging that microwave radiation exposures, taken together, be considered illegal, undemocratic, unconstitutional, and antithetical to the way life should be lived in a free and democratic society, because they serve as instruments of harm to the general population. They are instruments of surveillance, intelligence reduction, thought control and population reduction.

WHEREAS, the United States has no regulatory standards for microwave radiation intensity that are science-based and protective of human health; and

WHEREAS, the 1996 microwave radiation guidelines adopted by the Federal Communications Commission (FCC) are grossly unprotective of the health and safety of humans and other living things, and are among the most unprotective guidelines of any country in the world, serving only the interests of the wireless industry and not public health; and

WHEREAS, the US has an epidemic of electromagnetic radiation sickness (aka, EMS) dramatically affecting from six to ten percent of the population, such that wireless radiation from the usual sources that surround us are almost immediately sickening, create headaches, eye problems, disoriented thinking, and other such problems. and

WHEREAS, microwave radiation is also a long term hazard to all who are heavily exposed and yet people often do not realize that they are being affected; and the long term effects can include weakened immune function, long term neurological disorders such as cancer, troublesome infections, circulatory and heart problems, neurological disorders such as dementia, Parkinson's disease, ALS, depression and anxiety, thyroid and other endocrine disorders, infertility,

cataracts and other vision problems, thus toxic, un-natural EMFs such as from microwave exposure is a leading cause of disability and death; and

WHEREAS, microwave radiation levels today are far greater than those that were naturally experienced a few generations ago, by a factor of R, that equals ten to the 18th power. Since a billion is ten to the 9th power, R may be expressed in words as being a billion times a billion, or a billion billion. The enormity of this number expresses how far present society has departed from the conditions under which life on this planet was evolved thus making earth a different planet from what it used to be; and

WHEREAS, even the magnitude of the ratio R and the high intensities that people can measure on test meters do not fully express the biological impacts because the modulation and pulsation of the microwave carrier wave greatly increases the number of frequencies that the receiving person is being exposed to, and those myriad frequencies increases the magnitude of the biological effects that occur; and

WHEREAS, most people are entirely uneducated about these scientific realities, and their consent to being exposed to this hard-to-avoid microwave radiation is uninformed and mis-informed, and thus informed consent, a cornerstone of health freedom, is seriously lacking; and

WHEREAS, cell towers and rooftop cell antennas are a major source of extreme radiation intensities for those who are within 600 meters and are disabling or even lethal for those who are withing 300 meters, and yet they are deployed along highways, near schools and shopping centers, making travel and retail shopping a major hazard; and

WHEREAS, Wi-Fi provides the constant release of microwave radiation in indoor environments such as school classroom, offices, homes, buses and other public transit, and even homes, making such places hotspots of harmful microwave radiation exposures; and

WHEREAS, those exposed are usually unaware of how and when they are being impacted by such radiation exposures, and the consumers are almost never informed of how to avoid such exposures even though there are ways it can be done; and knowledge of safe, natural alternatives are censored by media and are not provided by governmental agencies; and

WHEREAS, cordless phones and cell phones are similarly harmful and yet are ever-present in the indoor and outdoor environments where people spend their time and compulsively and addictively use these devices; and

WHEREAS, “smart meters” are electric, gas or water meters that send their send their meter readings to the utility company with the rational of avoiding the cost and inconvenience of using a human meter reader but the undisclosed impacts are: 1) a strong source of microwaves radiation is being put on or just outside of the house or other building, putting a harmful source of radiation where it is not suspected as being harmful; 2) it also acts as a surveillance

device, gathering and saving information about a usages of electric devices and selling that information for profit, 3) the electric smart meter presents a fire hazard where such a hazard didn't exist before, 4) electric smart meter imposes an EMF pollution onto the wiring in the house known as "dirty electricity" which can cause cancer, among other disorders; and

WHEREAS, if an opt-out of a microwave-emitting smart meter is offered at all, it is always offered with an extra fee, monthly, for having the meter reading taken in a safe way, thus financially burdening low income and minority people who are thus deterred from choosing the opt-out for a safe meter; and

WHEREAS, small cell antennas, to accommodate the deployment of 5G telecommunication, are being built so as to surround the population of the US, with one or two small cell antennas on every block in every town and city in every part of the country; and

WHEREAS, the small cell infrastructure is going to produce far more damage to more people because small cell antennas will be much more densely located than cell towers and cell antennas and thus will be dangerously closer to a far greater number of people; and

WHEREAS, driverless cars produce a microwave radiation hazard to all oncoming traffic and all others using the roads, and not just to those who are inside of those cars, and

WHEREAS, users of 5G smart phones are reporting dramatic debilitating health problems including vision problems, headaches, disoriented thinking; the users are heavily targeted by the small cell's beam-forming technology, and yet these 5G smart phones are still being heavily promoted by the big media; and

WHEREAS, the buildout of the small cell antennas and usage of 5G is touted as being very beneficial because of greater bandwidth and much faster speeds of data delivery, but what is not being disclosed is that it is a **surveillance system** that can and will monitor every neighborhood everywhere, and it is a potential **weapons system** that can be used to target individuals or groups of people such as demonstrators protesting against corrupt and authoritarian governmental policies and practices; and

WHEREAS, frequencies being put out by a small cell antenna can be switched to higher frequencies such as 90 GHz, which is a military weapon frequency that can be used for "crowd control" as against lawful demonstrators, and 60 GHz which knocks the oxygen molecule into an excited state so that it cannot be taken up by hemoglobin in red blood cells, thus suffocating the victim, making him/her unable to use the oxygen that is being breathed; and

WHEREAS, climate engineering, aka geoengineering involves the use of weather as a weapon by our military in a scheme that uses aerosol spraying of metallic compounds which, after being ionized by sunlight, make the atmosphere more conductive and more responsive to manipulation by powerful phased-array antenna systems such as are found at Gakona, Alaska, that put out weather-

altering microwave radiation. This scheme allows weather extremes to be used as weapons so as to cause severe drought, tornadoes, hurricanes and flooding so as to harm chosen geographic areas; such a high-tech scheme can be tested upon an unsuspecting population either foreign or domestic, and can be deployed long term secretly and with hidden agendas. Unusual and extreme weather events can be and are ascribed entirely to global warming and climate change, thus allowing the travesty of these covert action operations from being exposed, publicly discussed and stopped; and

FINALLY, WHEREAS, the imposition of such microwave exposures constitutes, in essence, a “mandate” that people have to be microwaved in order to travel to attend a school, to work in an office or in a retail setting, or even live in a Wi-Fi ridden apartment complex. Like a covid shot mandate or a mandate to drink fluoridated water, the “microwave mandate” is made possible only by scientific fraud that covers up the risks and hazards, oversells the benefits, and is made possible only by a complicit media and by the corrupt regulatory agencies (the FCC and the FDA) that have been captured by the industry that they are supposed to regulate.

THEREFORE, BE IT RESOLVED that the above-mentioned microwave radiation exposures, taken together, be considered illegal, undemocratic, unconstitutional, and antithetical to the way life should be lived in a free and democratic society because they serve as instruments of harm to the general population as they are instruments of surveillance, intelligence reduction, thought control and population reduction; and

BE IT IS RESOLVED IN PARTICULAR THAT;

- a) cell towers and rooftop cell antennas should be powered down and removed because of their extreme hazard to those who are being exposed to their radiation.
- b) airport radar and military radar applications can continue to be allowed but only on a case of case basis, with careful evaluation of the impacts on those workers, travelers and nearby residents who are being exposed.
- c) Wi-Fi in schools, offices, legislative chambers and all such public spaces, trains, buses, hotels and other commonly used areas should be phased out, and replaced with wired internet connection.
- d) Cordless phones are inherently unsafe and should be banned. Similarly smart meters should be banned from all locations in homes and other buildings where humans will come with 30 feet, and all electric meters that remain should be required to eliminate the dirty electricity that they now recklessly cause. Opt-out fees that have been imposed on utility customers who have chosen to opt out should be immediately halted.
- e) The entire small cell infrastructure should be dismantled as it is not needed and was built for an insidious totalitarian agenda, a military and surveillance agenda, and not for the purposes that have been marketed to the public. No citizens should have to live in neighborhoods where they are circumscribed by a military surveillance and weapon system

- that is pointed at them and that can be used by the controllers at their will.
- f) The climate engineering - geoengineering scheme, which is the epitome of totalitarianism and corruption, should be halted and public hearings should be held in which testimony should be allowed to reveal the harmfulness of the weather-as-a- weapon system and uncover how it has already been used, for decades, to impact weather and well-being of people domestically or foreign. Such secretive deployments are incompatible with a free and democratic society. Tech-based totalitarianism is just as harmful as pharma-based totalitarianism and so the buildout of structures and systems that serve the purposes of tech-based totalitarianism should be stopped and dismantled, just as surely as pharma-based totalitarianism needs to be dismantled. Our health and our freedom require all of that.

THEREFORE, BE IT ALSO RESOLVED THAT the following Voting Members of the US Health Freedom Congress do affirm that their organizations will work to stop involuntary exposure to toxic, unnatural EMFs and excessive and elevated microwave radiation:

America's Frontline Doctors
Children's Health Defense
Dental Amalgam Mercury Solutions (DAMS)
ElectromagneticHealth.org
Health Freedom Defense Fund
Health Rights MA
Illinois Freedom Alliance
Minnesota Natural Health - Legal Reform Project
National Health Federation
National Health Freedom Action
National Health Freedom Coalition
NSIR Technologies School of Alternative Healing
Organic Consumers Association
Physicians and Patients Reclaiming Medicine
Robert Scott Bell Show
The Truth About Cancer
Voice for HOPE (Healers Of Planet Earth)
Weston A Price Foundation (WAPF)
